DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 12, drawn to a method of delivering a substance to microtubules in a cell by exposing microtubules to the substance which is attached to a herpesviral VP22 protein, classified in class 514, subclass 2.
 - II. Claims 13-16, drawn to methods of preparing a medicament for delivery to microtubules through attaching them to a herpesviral VP22 protein, classified in class 530, subclass 402.

The inventions are distinct, each from the other because of the following reasons:

2. The inventions of Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions relate to methods for performing different functions. The inventions are therefore distinct.

Species Election

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

Art Unit: 1648

For each of Groups I and II above, the Applicant is also required to elect one of Species.

(A)-(C). These species represent the elected invention wherein the substance is attached to the VP22 protein:

- (A) through fusion,
- (B) covalently, or
- (C) non-covalently.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 12 and 13 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1648

Conclusion

4. Because these inventions are distinct for the reasons given above, because they have different classifications, and because the literature and sequence searches required for any one of the groups is not required for the others, restriction for examination purposes as indicated is proper.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zachariah Lucas whose telephone number is 571-272-0905. The examiner can normally be reached on Monday-Friday, 8 am to 4:30 pm.
